Fullstack developer — 2021
Fullstack developer — 2021
App developer — 2021
Frontend developer — 2020
RPA developer — 2020

Mangkan

Mangkan is a start-up I cofounded which goal is to create an app to allow mangas readers to track their reading progress. I am in charge of development and I use React Native, GraphQL and Nodejs.

Freelance

I created 3 websites for different needs:

- [a restaurant](#) (design + dev)
- [a mariage](#) (design + dev)
- [a designer portfolio](#) (dev)

Silvr

I worked on a programmable LED screen, running thanks to a Raspberry Pi. I developed the scrolling engine, the API architecture as well as the web interface that controls what the screen displays.

Pricing Pact

During this 6-month internship in Belgium, I took part in the development of a pricing web solution developed with React, Nodejs, graphql and PostgreSQL in an agile environment.

Ublo

We built a property management solution for public lessors, using React, a REST api and Docker.

Wolfox

I was in a two person team with a designer to create websites for various clients. Our main project was for Trans Gender Europe: we had to build [an interactive version of the Trans Rights Map](#).

Art office of IMT Atlantique

With a friend, we used Figma and Flutter to develop an app whose purpose is to assist the players of a game called "Caps".

Robotic Club of IMT Atlantique

I developed a website in React to present the robot that the club was building to participate to the French Robotics Cup.

Colas Digital Solutions

I implemented software bots to automate tasks and especially to gather the loading speeds of web pages of the company's websites.

SKILLS

Web dev

HTML/(S)CSS
React
Vuejs
Docker
Nginx
REST API/GraphQL
Gatsby
Strapi

App dev

Flutter
React Native
Java for Android
XML

Databases

MongoDB
MySQL / PostgreSQL
Neo4J
Firebase

Design

Figma
Adobe XD
Adobe Illustrator

And more...

Python
Git
C / C# / C++
Matlab
Automation Anywhere
Heroku / netlify / hostinger / ...
